Retrospective

Team AYEN

Ethan Lew, Nicholas Lozano, Yaseen Khan

If we did the project again, we would:

1. Start the project sooner
2. Ask more clarifying questions about the requirement
3. Finish in time for a dry run
4. Have more team reviews
5. Be more communicative with the team
6. Revise our user stories more closely

Some blockers we had in the way of making progress were:

1. Lack of knowledge with Qt and SQLite
2. A group member left our group at the end
3. Issues using SQLite on MacOS correctly
